Context and Problems

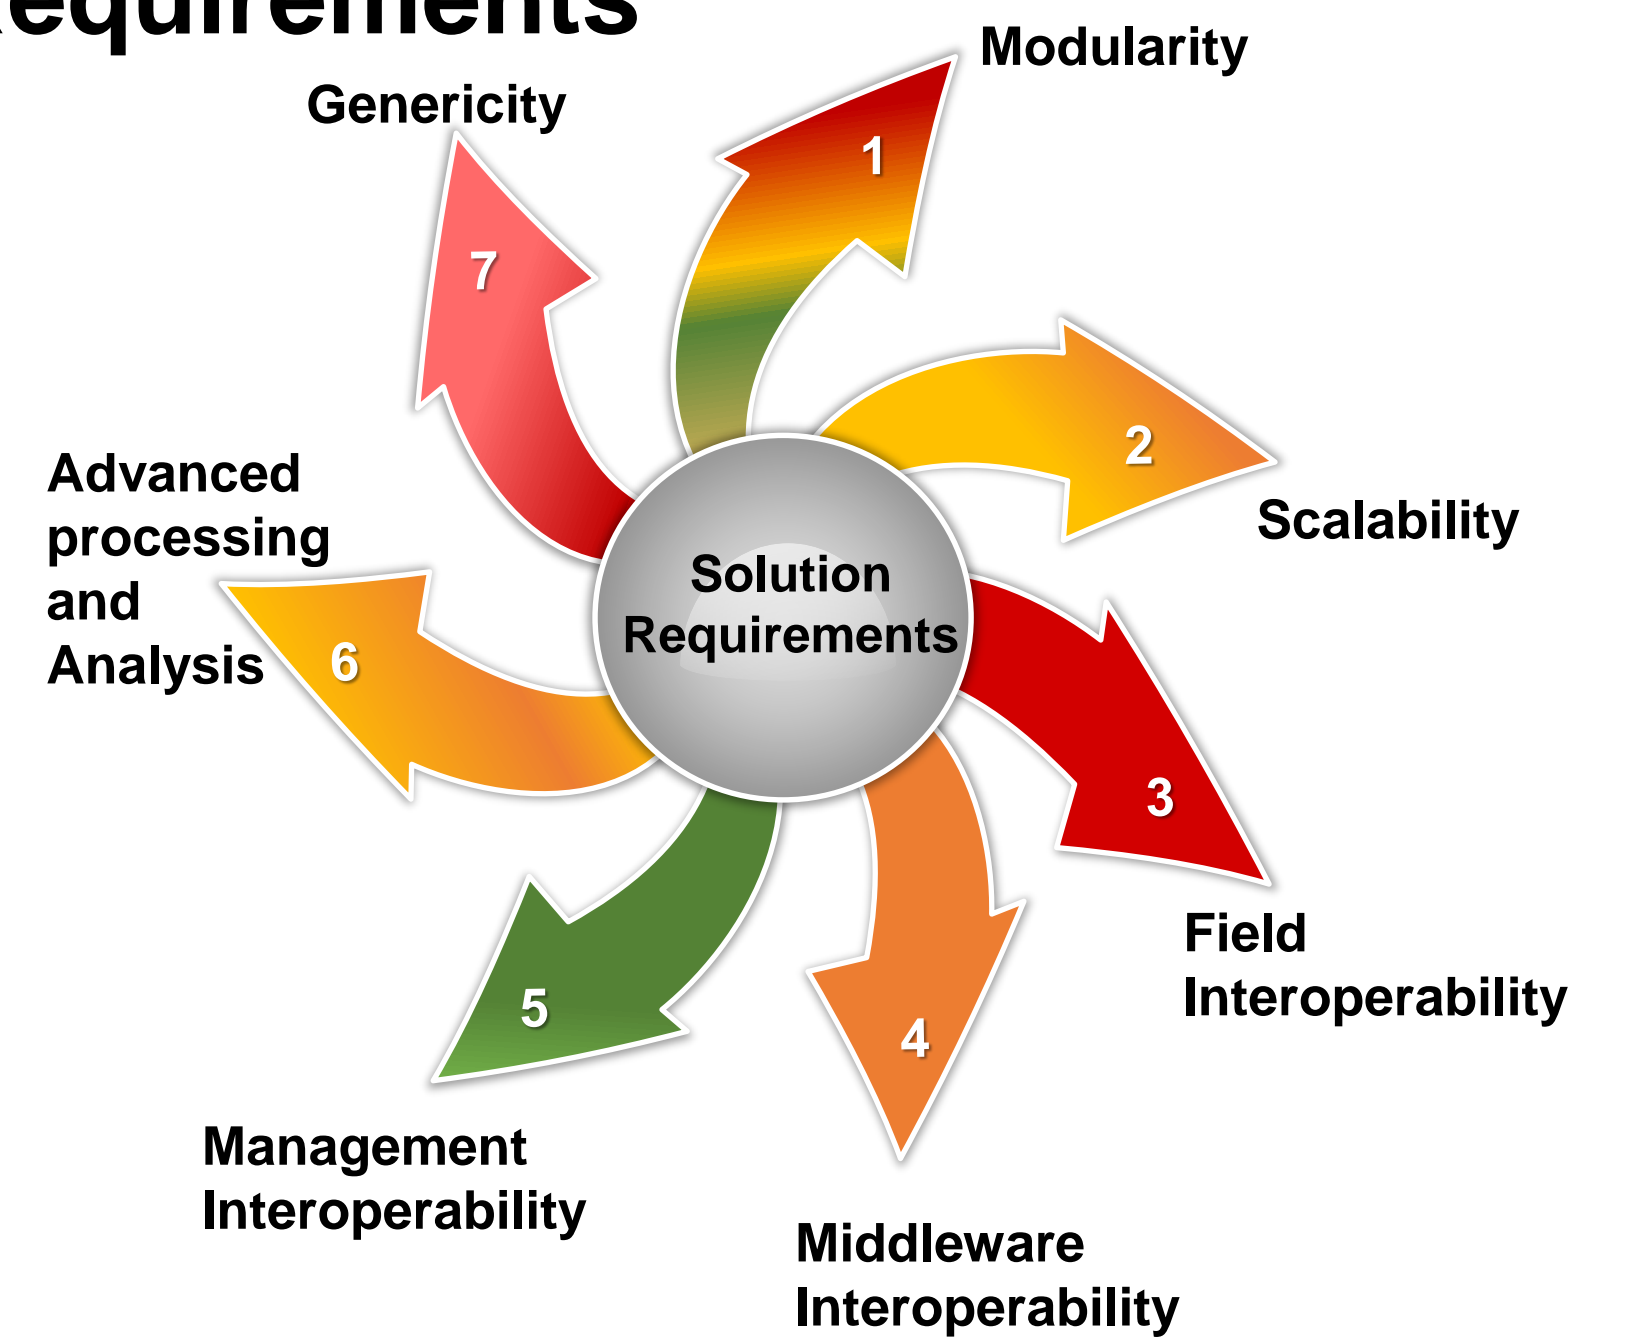

Gap Sources

- Inaccurate simulations
- Poor quality of constructions
- Inadequate exploitations of buildings
- Inadequate, rushed or incomplete commissioning of systems
- Limited data analysis

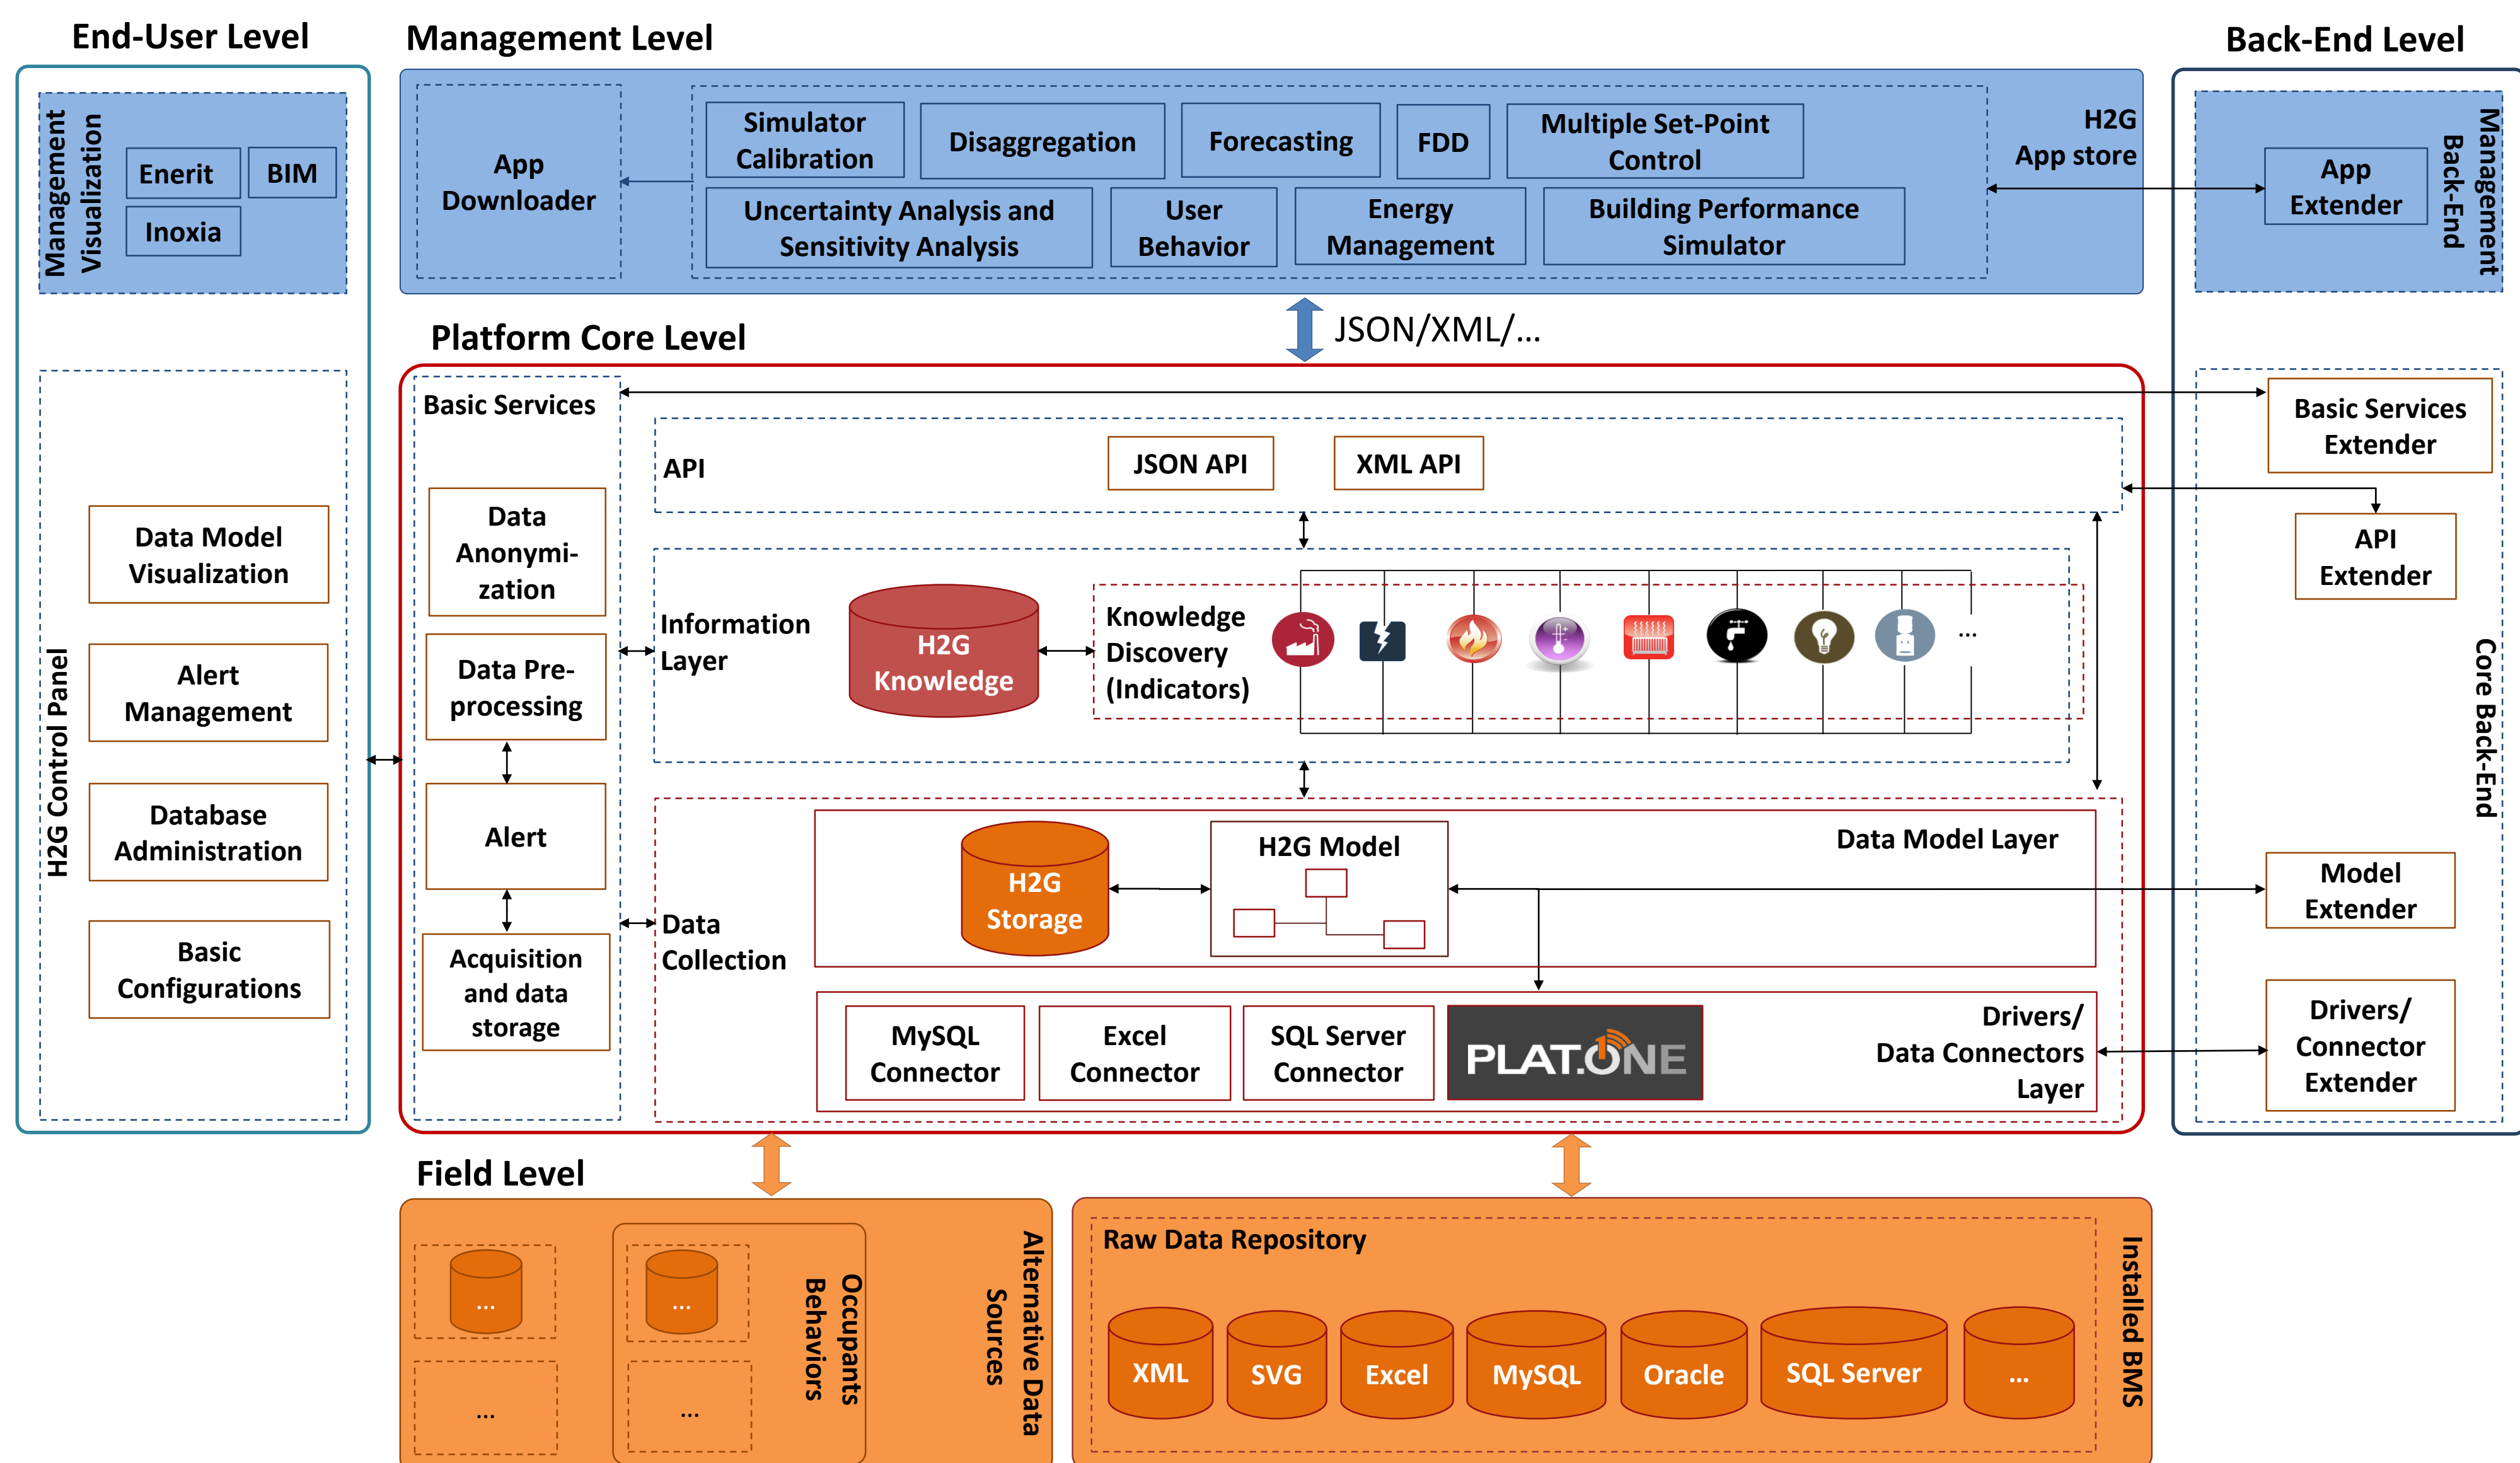

BMS Technical Challenges

Requirements

Approach Overview

Reference

The HIT2GAP project (Highly Innovative building control Tools Tackling the energy performance GAP) has received funding from the European Union's Horizon 2020 research and innovation program under grant agreement N° 680708, <http://www.hit2gap.eu>
